## Tell us about the manufacturing & marketing Operation of Klaus Multiparking Systems?

KLAUS Multiparking is one of the first entrants to the mechanized parking industry in the year 2002 and since then we have invested in developing a state-of-the-art manufacturing facility in Shirwal near Pune.

In terms of manufacturing we have a complete in-house process with robotic welding, laser cutting, bending and powder coating. As we have maximum facilities in-house, we are able to control the product quality and also reduce the overall manufacturing lead time.

KLAUS multiparking ensures continuous learning and research in businesses to allocate resources to actively research and stay updated on emerging technologies and industry trends. Participating in industry-specific conferences, trade shows, and exhibitions provides opportunities to interact with technology vendors, attend keynote speeches and panel discussions, and gain insights from thought leaders.
